Confidential Information

The following report contains confidential information. Do not distribute, email, fax or transfer via any electric mechanism unless it has been approved by your organization's security policy. All copies and backups of this document should be maintained on protected storage at all times. Do not share any of the information contained within this report with anyone unless you confirm they are authorized to view the information.

Disclaimer

This, or any other, vulnerability audit cannot and does not guarantee security. McAfee makes no warranty or claim of any kind, whatsoever, about the accuracy or usefulness of any information provided herein. By using this information you agree that McAfee shall be held harmless in any event. McAfee makes this information available solely under its Terms of Service Agreement published at www.mcafeesecure.com.

Disclosure

As a systems and networks security company, McAfee produces and sells a range of products separately from services provided as an Approved Scanning Vendor. McAfee security products include but may not be limited to the following categories: application or network firewalls, intrusion detection/prevention, database or other encryption solutions, security audit log solutions, anti-virus solutions

Severity Level System

The severity level system in use by McAfee SECURE rates vulnerabilities with a numeric score from 1 to 5, where a higher numerical value indicates a higher severity. The system is linked to the CVSS base score and in this system, a vulnerability with a CVSS base score of 4.0 or greater, that impacts either confidentiality or integrity, will have a severity rating 3 (high), 4 (critical), or 5 (urgent). DOS (Denial of Service) vulnerabilities themselves are not PCI violation.

1 - Executive Summary of Visa Asia Pacific's AIS Validation Report

McAfee has determined that 'NETPORTS PTY LTD' is **COMPLIANT** with the PCI scan validation requirement.

PCI Scan Status: **Passed**

As a Qualified Independent Scan Vendor McAfee is accredited by Visa Asia Pacific to perform network security audits conforming to the Visa International AIS standard within the framework of the Payment Card Industry (PCI) Data Security Standards. To earn certification of Visa AIS compliance network devices being audited must pass tests that probe all of the known methods hackers use to access private information, in addition to vulnerabilities that would allow malicious software (i.e. viruses and worms) to gain access to or disrupt the network devices being tested. This audit report summarizes the results of these tests, and presents detailed information on the current security status of each network device covered in this report. NOTE: In order to demonstrate compliance with the Visa AIS requirements, no vulnerabilities listed as URGENT, CRITICAL or HIGH (numerical severity ranking of 3 or higher) may be present on any device within this report.

Scan Summary

Following Devices/Domains have been scanned:

netports.com.au

Scan Date Completed: 23-APR-2013 02:30

2 - Visa AIS / PCI Security Scan

Name	Scan Date	PCI Compliant
netports.com.au (IP: NFP)	23-APR-2013	Pass

4 - Compliance Glossary

Visa AIS and PCI Data Security Standards

AIS Validation: Signifies device, as of the date of this report, is compliant with the remote vulnerability audit requirements of the Visa International AIS standard within the framework of the Payment Card Industry (PCI) Data Security Standard.
